Report for field trip 2 to Kirti Nagar

UMEED: A DROP OF HOPE
FIELD TRIP REPORT :

Education holds a pivotal role in the progressive development of any nation, commencing from the nurturing environment of one's home and extending throughout a lifetime. Aligned with our ambitious endeavour, "KNOWLEDGE FOR ALL," we are steadfast in our commitment to bestowing invaluable benefits upon the youngest members of our community - the children. Our primary objective is to instil the core essence of education. Beyond conventional academic pursuits, we actively engage with these budding intellects to imbue them with an understanding of sanitation and hygiene practices.

During a culminating experience, we visited Kirti Nagar, where we orchestrated a campaign uniting approximately 70-80 students across nursery to 8. This educational initiative lasted around 3-4 hours. These students are from government schools, I personally taught over 5 students in the session. The brightest one was the nursery kid, who just wanted to keep learning even after 12 noon in the after noon heat....I knew that kid will go to far places. I really got the see and realise how privileged I am to get such good facilities. I even caught a fungi infection two days after the visit, clearly signifying how much support these children need.

Lastly, I would like to sincerely thank our dedicated volunteers who generously give their time and effort every Sunday to organize these events
