Report for field trip 1 to Kanhaiya Nagar

UMEED: A DROP OF HOPE  
FIELD TRIP REPORT :

Education holds a pivotal role in the progressive development of any nation, commencing from the nurturing environment of one's home and extending throughout a lifetime. Aligned with our ambitious endeavour, "KNOWLEDGE FOR ALL," we are steadfast in our commitment to bestowing invaluable benefits upon the youngest members of our community - the children. Our primary objective is to instill the core essence of education. Beyond conventional academic pursuits, we actively engage with these budding intellects to imbue them with an understanding of sanitation and hygiene practices.

During a culminating experience, we visited Kanhaiya Nagar where we orchestrated a campaign uniting approximately 30-40 students across nursery to 8. This educational initiative lasted around 3-4 hours. These students are from government schools, The children had just finished their exams and were not in a mood to study....Still we taught collectively for some time. Then, we organized a realy race for the children. I really got the see and ralise how privileged I am to get such good facilities..

Lastly, I would like to sincerely thank our dedicated volunteers who generously give their time and effort every Sunday to organize these events
